· Ecotoxical effects:

· Remark:

Toxic for fish

The product causes an alteration of the pH-value within the testing system. The result refers to the non-neutralised sample.

After neutralization a reduction of the harming action may be recognized

- · Additional ecological information:
- · General notes:

Avoid transfer into the environment.

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach sewage water or drainage ditch undiluted or unneutralized.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.
