- Soft Close Doors
- 1/2" engineered wood shelves

SAWYER COLORS:

SLOANE AND SHEA COLORS:

SMARTSHIELD

KITCHEN KOMPACT COLORS:

Available in most, but not all areas.

STANDARD VS FULL OVERLAY

Standard overlay (face frame) cabinets are made to show the frame of the cabinet around the door and drawers—for a more traditional look.

Full overlay cabinets show very little of the cabinet frame, because the door and drawers cover the cabinet face—for a more modern look.

Frameless options may be available upon request.

Note: Actual cabinet colors may vary from shown due to difference in wood grain, stain, paint and viewing medium.

CABINETS

SPECIAL ORDER CABINETS IN BEASY STEPS WOLF CLASSIC™ INSIGHT SERIES

WOLF CLASSIC™ IMPACT SERIES

HANOVER AND GRANTLEY

HANOVER AND GRANTLEY FEATURES:

- Flat Panel Door / Slab Drawer
- Standard Overlay

Note: Actual cabinet colors may vary from shown due to difference in wood grain, stain, paint and viewing medium.

3 SELECT YOUR CABINET BOXES

Once you have chosen the cabinet style and color, it's time to measure and select the cabinets that will best fit together to create the perfect kitchen or bathroom to increase your property's value.

Our Chadwell Supply Territory Managers or Renovation Field Managers can help. Call your local representative to arrange for someone to come measure. Then work together to layout your space, receive a quote, and place the order.

Note: The cabinet line drawings that follow are only a representation for all cabinets. The cabinet style picked in Step 1 will determine the actual look of the door. Some of these cabinets are not available in all styles. Our team will help with your plan.

42"		WC4242	Blind Corner Cabinet		

Max Pull is 3". See Measurement Specifications. Filler Not Included.

BLIND CORNER CABINET SPECIFICATIONS

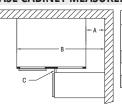

Blind cabinets have a minimum and maximum "pull" (A) depending on the cabinet style. This is the space the cabinet is "pulled" away from the adjacent wall. The pull space is necessary to keep adjacent doors and/or drawers from hitting into each other. Typically filler pieces (C) will also need to be installed between the blind cabinet and the adjacent cabinet to further prevent doors and drawers from hitting the other cabinet or any knobs/handles that stick out.
